SIEMENS

Data sheet 6GK1901-1BB50-0AA0

product type designation	**IE RJ45 Port Lock**
product description	RJ45 port lock
	IE RJ45 port lock RJ45 port lock with keys for mechanical locking of RJ45 ports 1 pack = 1 unit.

Technical Product Detail Page	https://i.siemens.com/1P6GK1901-1BB50-0AA0
suitability for use	for mechanical closing of unused RJ45 ports
interfaces	
number of electrical connections	
● for Industrial Ethernet FC TP cables	0
● for network components or terminal equipment	1
type of electrical connection	
● for network components or terminal equipment	RJ45 connector
type of electrical connection / FastConnect	No
mechanical data	
material / of the enclosure	plastic
design, dimensions and weights	
type of cable outlet	180° cable outlet
width	11.7 mm
height	15.6 mm
depth	32.2 mm
net weight	0.01 g
ambient conditions	
ambient temperature	
● during operation	-20 ... +60 °C
● during storage	-20 ... +60 °C
● during transport	-20 ... +60 °C
protection class IP	IP20
product features, product functions, product components / general	
product feature	
● PoE capability	No
● PoE+ capability	No
● silicon-free	Yes
product component	
● strain relief	No
standards, specifications, approvals	
certificate of suitability	
● RoHS conformity	Yes
● UL approval	No
● cULus approval	No
● railway application in accordance with EN 50155	No

security information

security information	Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under https://www.siemens.com/cert. (V4.7)
